Art Unit: 2816

1. Applicant's request for an RCE application and preliminary amendment filed on 3/30/05 have been received and entered in the case. The previous rejection under 35 USC 112, second paragraph is now withdrawn in view of the amendments included therein.

However, the obviousness rejection based on Mashiko is maintained, as set forth below.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 1, 3-20 and 23-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mashiko.

See paragraph four of the previous office action (final rejection) mailed on 12/1/04 for the details of this rejection.

4. Applicant's arguments filed on 3/30/05 have been fully considered but they are not persuasive.

Applicant's arguments are all directed to alleged differences between the results and/or advantages of the invention as compared to the results and/or advantages of Mashiko's device. As applicant is well aware, this is not a proper way of distinguishing claims from the applied prior art. If there are any differences in the structure or function

Art Unit: 2816

recited in applicant's claims as compared to the disclosure of Mashiko, such differences should be identified in applicant's arguments. If no such differences exist, then the claims need to be amended so that such differences are present in the claims. This is long established U.S. patent practice that applicant needs to follow.
